Change in Vision

Previous ideas:

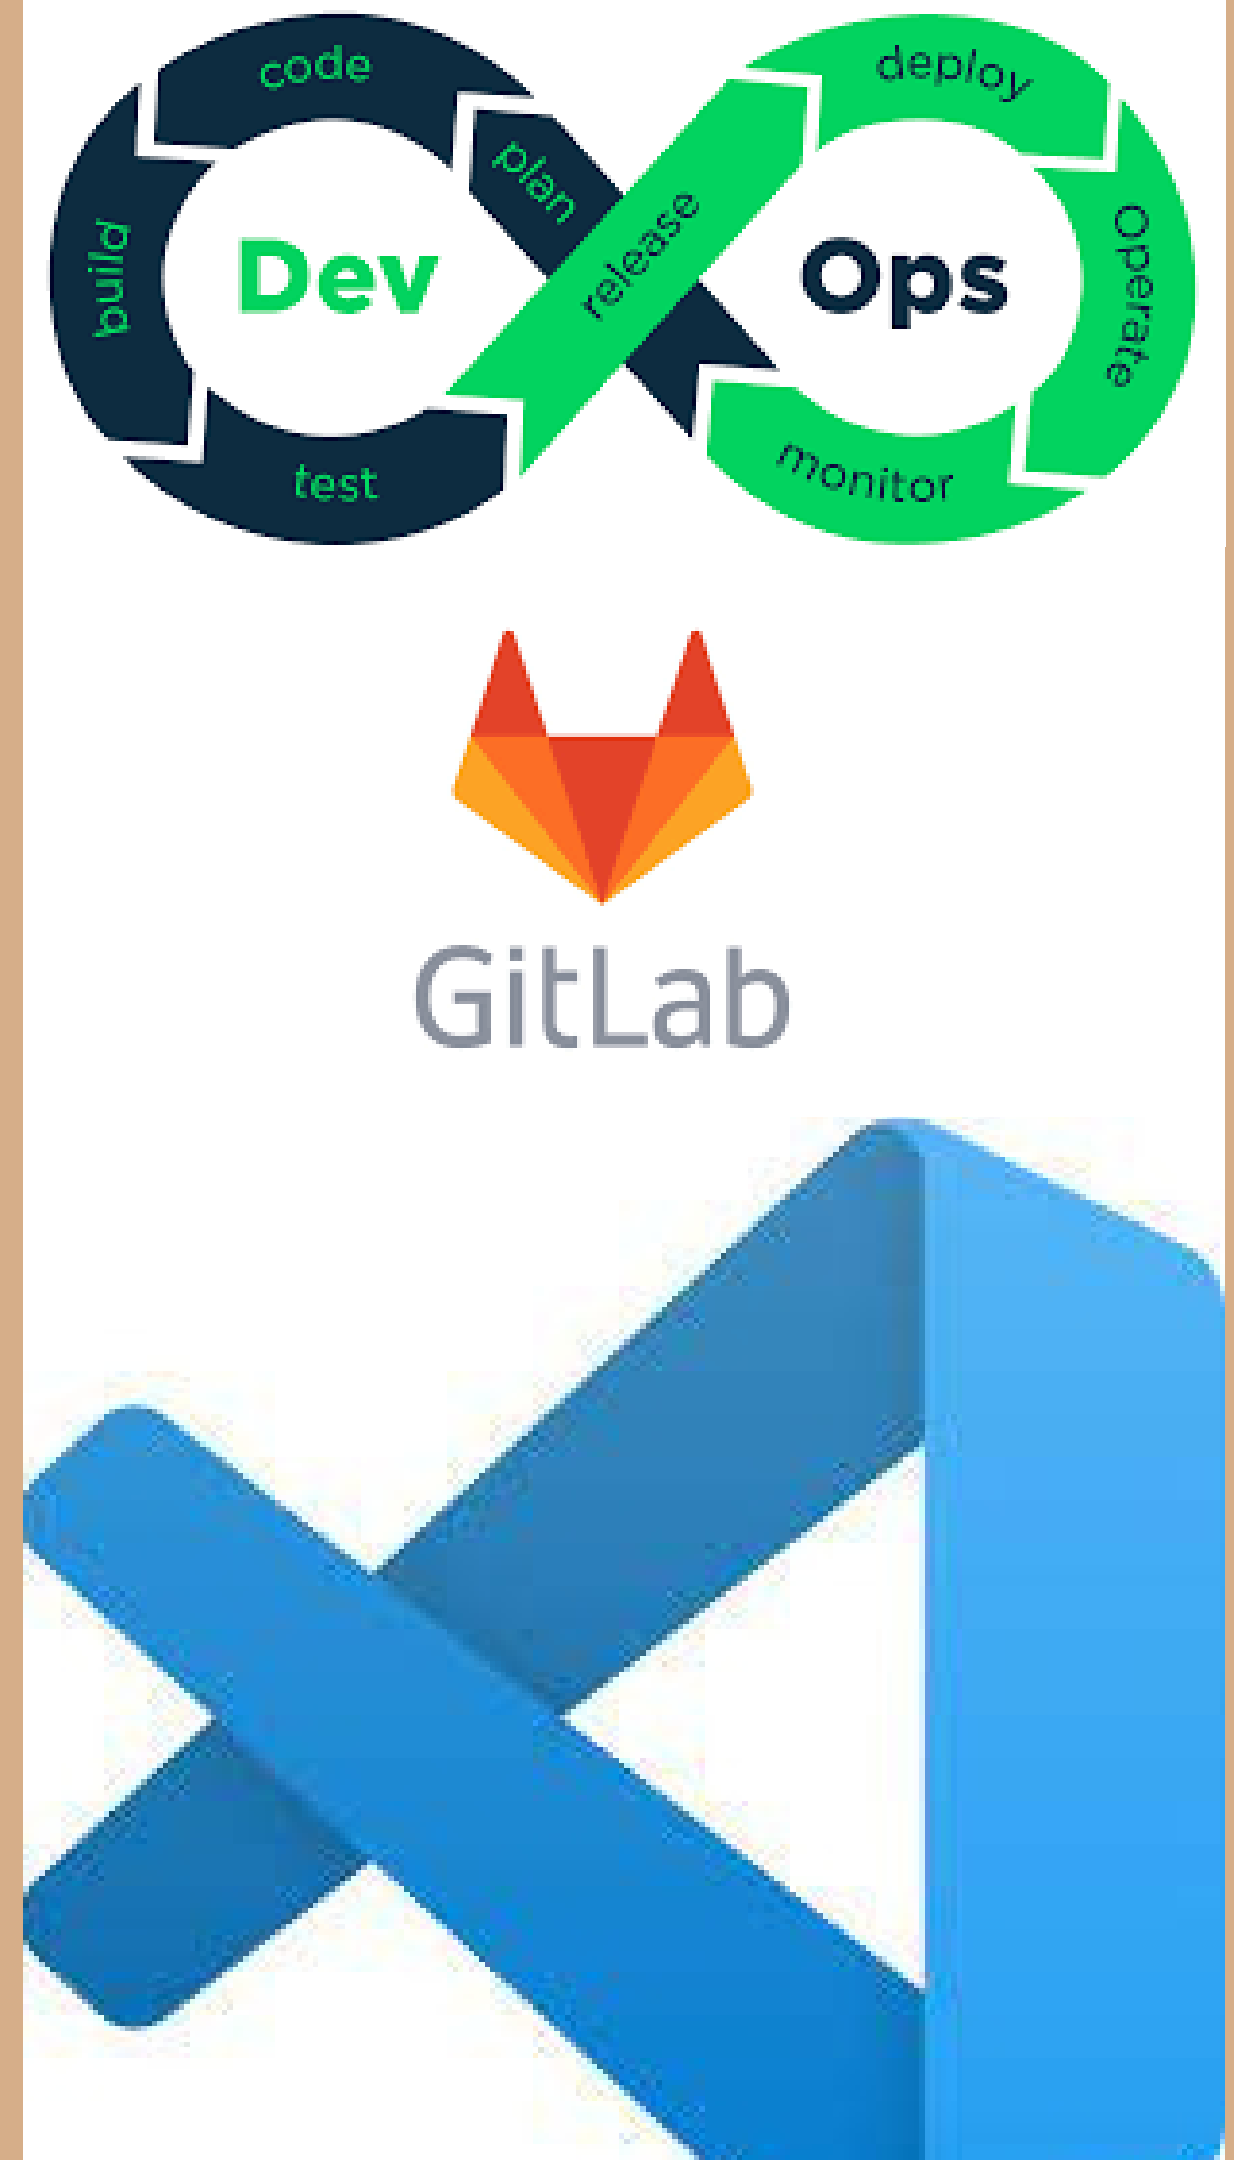

- Just writing the codes.
- Mere completion of tasks
- Individual work

After The Project:

- Understandable and user friendly product.
- Usage of Proper Tools
- Importance of team work

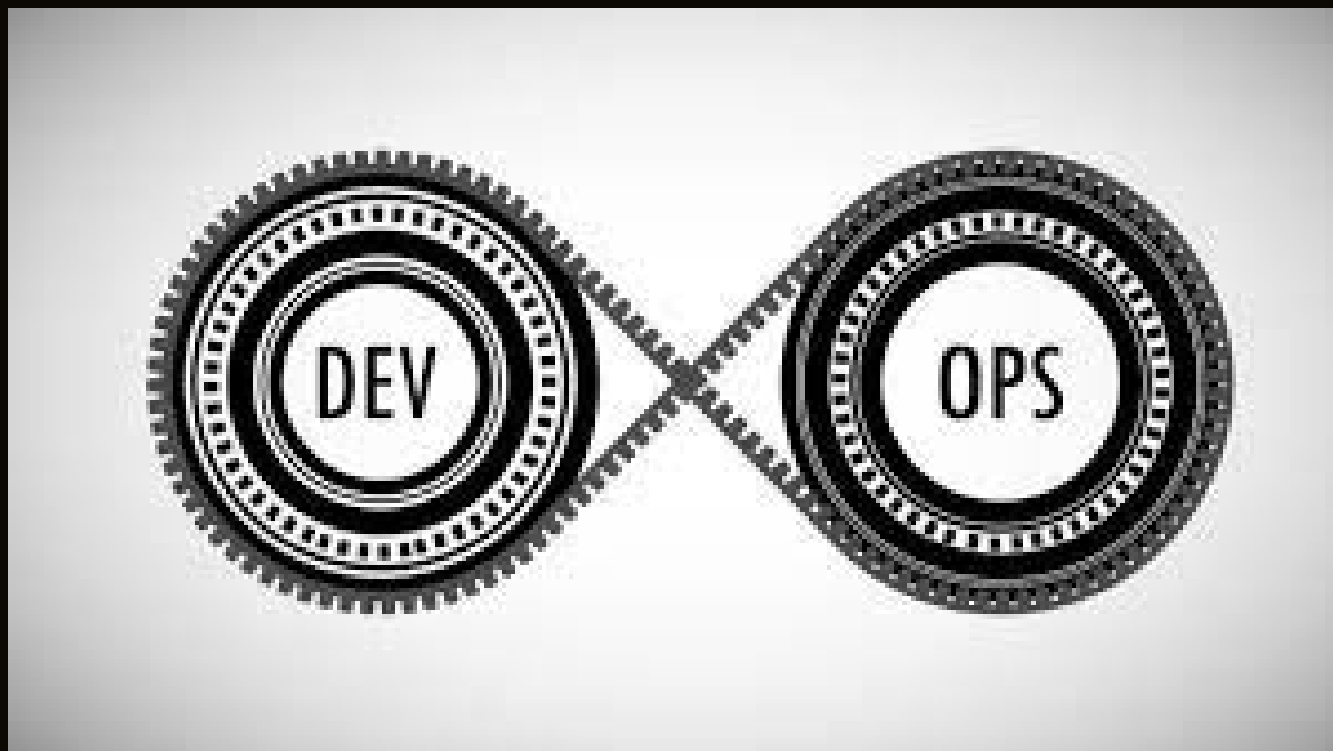

Collection of tools we got familiar with.

1. DevOps and other SDLC models
2. Gitlab workflow – To collaborate with various people
3. VS code for c/cpp and python
4. Documentation tools – How you can make a document more readable by using markdown tools.
5. Project management tools – Project planning and creating user stories, tasks and subtasks on gitlab

Why DevOps

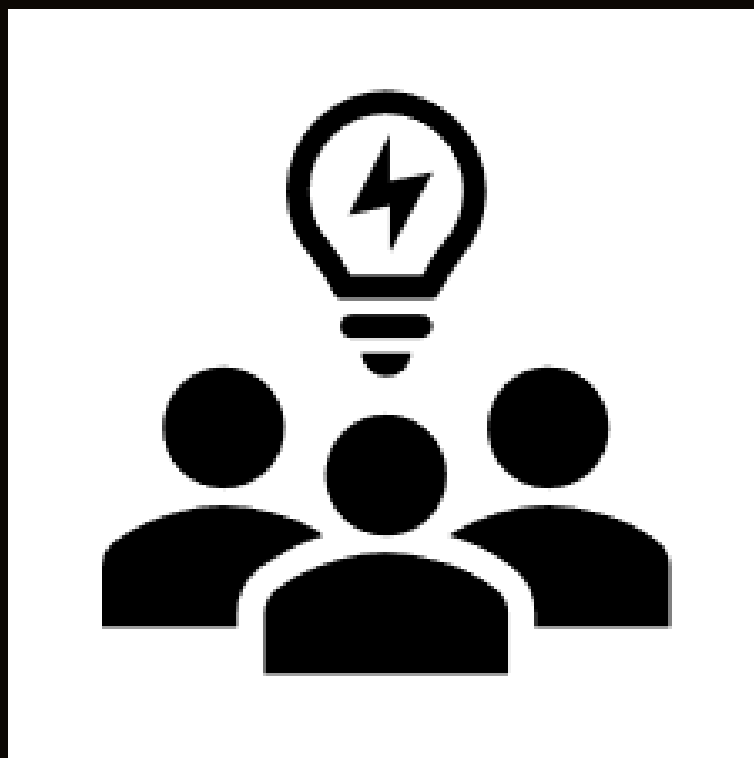

- CONTINUOUSLY CODING, TESTING, DEPLOYING AND RECEIVING FEEDBACK

- ENABLES FASTER DEVELOPMENT OF APPLICATIONS

- SHORT, CONTROLLABLE ITERATIONS

Why Project Management

BRINGS CLARITY TO THE
USER ABOUT THE PROJECT

DELIVER REAL VALUE
AGAINST THE BUSINESS
OPPORTUNITY.

CLEAR FOCUS AND
OBJECTIVES

Why Code Refactoring

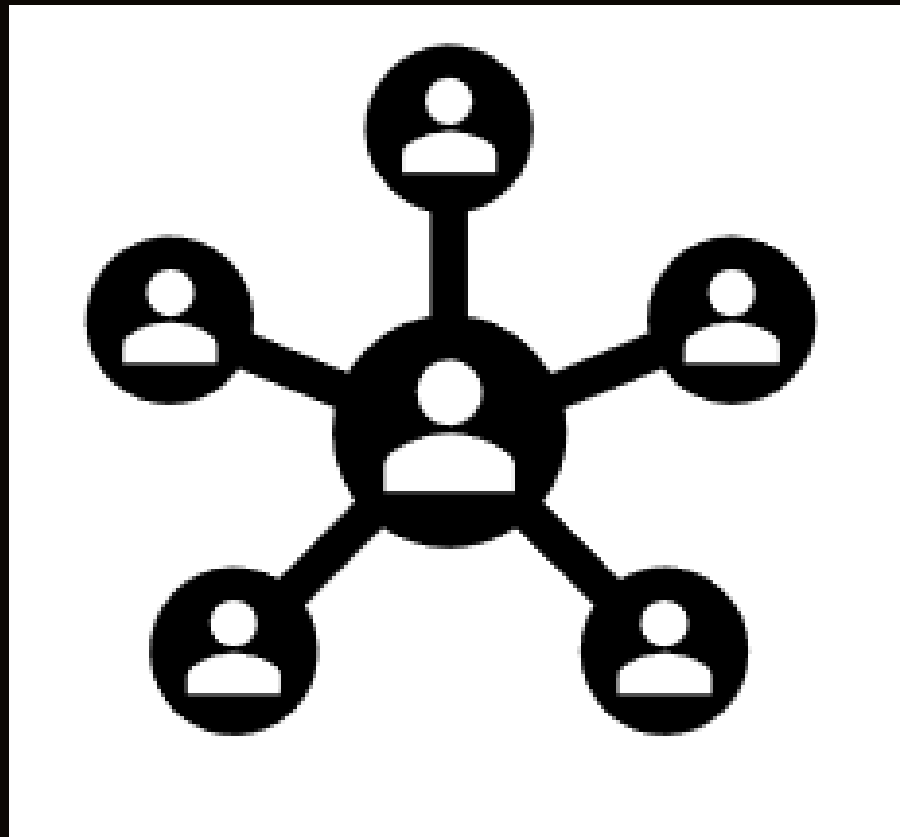

NEED TO FIT INTO
INDUSTRY CODE
STANDARDS

UNDERSTANDABLE
READING AND
PRESENTATION OF
DOCUMENTATIONS

EASY AND SUSTAINABLE
CODE

Why Effective Communication and Team Building

→

- SYSTEMATIC WORK FOR BETTER RESULTS

- EFFECTIVE RESUME AT INDUSTRIAL LEVEL

- TO HAVE INCLINED GROWTH WITH STEADY TEAMWORK FORMATION

THANK YOU!

We are very grateful to IoTIoT for giving us the opportunity to present ourselves in front of corporate industry professionals.

We experienced professional working style and tools.

Thankful towards the team members.

Thankful towards Sejal Gupta ma'am.
